1pm - lunch break

Designing for the Site - a practical approach.

Walk through two examples at Wild Moss - addressing specific problems.

The Maturing Garden - build your own moveable poly tunnel/row cover (handout provided).

What sets Bio-Dynamics apart? The use of BD Preparations and Sprays.

BD stir and spray a Fermented Nettles Foliar Spray.

Questions on content.

4:30pm - windup

BIO - JULIA & CHARLES YELTON

During our 30+ years of teaching, Charles and I have designed and implemented Forest Gardens in every climate zone. From our first in the sub-tropics on our property at Crystal Waters Permaculture Village to the very dry island of Cyprus, wet and windy Ireland, the cold northern states in the USA, even the coral island of Nassau in the Bahamas... to name just a few. The principals remain the same but plant species are specific to climate and conditions.

CREATING A BIO-DYNAMIC COOL TEMPERATE FOREST GARDEN

WHAT TO BRING

All workshops are experiential and we will be out on the land... please wear appropriate clothing, boots and hat according to the prevailing weather conditions. Some notes will be provided but please bring your own notebook/pen for note taking.

REFRESHMENTS

10:30 morning break - morning tea is provided.

1pm lunch break - hearty soup is provided. Please bring extra snack/sandwich, mug, bowl, cutlery.

PARKING

Look for the Bio-Dynamics Tasmania banner... a parking attendant will guide you to appropriate parking.

Please share-ride if possible to ease congestion.

PETS

This is a very active day and dogs are not welcome... thank you.

COVID

Current COVID restrictions apply. Please do not come along if you are feeling at all unwell.

BOOKING INFORMATION

Refunds are not available. If you are unable to join us, you are welcome to pass your ticket to friends and family. Alternatively we may be able to offer to someone on our waitlist.

Cost:

Members - \$80/person

Non-members - \$100/person
